## PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the CIA Photographic Intelligence Division.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

#### SUMMARY

Ulan-Ude Ammunition Supply Depot Taltsy (Figure 1) is located 12 kilometers (km) east of Ulan-Ude (51-50N 107-36E) and 19 km southwest of Onokhoy-Shibir (51-55N 108-04E). Access to the installation is provided by the Trans-Siberian railroad and by a probable hard surface, all-weather road (Figures 2 and 3).

The installation is double-fenced, enclosed by a firebreak, and covers approximately 700 acres. It contains 85 buildings including one administrative building, three probable barracks, 49 probably revetted ammunition storage buildings, 24 support/storage buildings, seven support buildings and one equipment storage and

maintenance building. The installation is divided into two areas, an ammunition storage area and an administrative/barracks/support area. A possible rail spur is adjacent to the west edge of the installation. A probable hard-surface all-weather road connects the installation with points north and south. A possible sensitive storage area is located in a revetted building just outside the compound.

The area has been covered by [redacted] missions [redacted] coverage indicates that the installation is occupied, but no apparent change has occurred [redacted]

#### DESCRIPTION OF INSTALLATION

##### Railroad Service

There are two tracks, but no rail spurs enter the enclosed compound. The presence of trackside docks and rail-end loading docks is undetermined.

##### Road Service

A probable hard surface, all-weather road connects the installation with points north and south along the rail line. Secondary roads connect the surrounding area.

##### Aircraft Landing Strips

There are no aircraft facilities at this installation. The nearest facility is Ulan-Ude Airfield East (51-51N 107-43E) 5 km west-northwest.

##### Administrative and Troop Housing Area

Area D (Figure 3), located in the northwest sector of the installation near the rail line, contains one administrative building, three probable barracks and 13 support/storage buildings. There is possible billeting in this area.

##### General Storage Area

Probable general storage is located in area D.

##### Ammunition Storage Area

Area F, a double-fenced area, contains two 190- by 45-foot, eight 160- by 45-foot, six 140- by 45-foot, eighteen 125- by 45-foot, fifteen 105- by 45-foot ammunition storage buildings; 11 support/storage buildings and six support buildings. The ammunition storage buildings are probably revetted.

A small single-fenced area, F2, and a probably revetted building (possibly for sensitive storage) are outside the main compound on the west side. Other buildings are possibly hidden in the wooded area.

##### Equipment Storage/Maintenance Area

Area J, a probable equipment maintenance and storage area, contains one 215- by 35-foot equipment storage and maintenance building, one support building and an open storage area.
